

California Adult Education Program (CAEP) leadership has identified a diverse and representative group with impressive expertise and insight on adult education's role in supporting immigrant integration.

In carrying out the requirements of California **Assembly Bill 2098**, this group will develop recommendations for a set of immigrant integration measures that consortia may use to document adult education's contributions to this important population, and by extension their families, communities and the state as a whole.

Our goal is to facilitate a transparent and dynamic process. Meetings will begin next month and run through May. **[Here is the workgroup roster.](#)**
