

CAEP TAP Professional Development Event – Lesson Study Institute

The CAEP TAP invites Administrators and Instructors to participate in the Lesson Study Institute in the Central Valley! The Lesson Study Institute, presented by Jacques LaCour, an AIR Subject Matter Expert, is a powerful research-based collaborative professional development approach to getting the best out of students by supporting teachers to do better work together than any one teacher could do on her/his own. Lesson Study will start or refocus a professional learning community, improve learner engagement and outcomes, expand instructional and assessment skills, and increase teacher job satisfaction. Lesson Study is a collaborative process by a group of teachers that can be used for all content areas and across schools and systems.

For this institute, up to 40 participants will come as teams. A team can be from a school, consortium, or a couple of schools within a consortium. A team should consist of 2 or 3 teachers and an administrator or the person who has responsibility for professional development for the agency. If participants register without a team, it's not a deal breaker, but the training will be most productive for teams. In addition, we want to encourage administrators support; however, we will not exclude participants who can't get an administrator to join them.

The Lesson Study Institute will consist of the following:

- One, 75-minute pre-training (prerequisite) webinar will take place on March 12th at 3:30 p.m.
- One full day, in-person training will take place on March 22nd from 9:00 a.m. to 4:00 p.m.

The in-person training will take place at Clovis Community College - Herndon Campus – from 9:00 a.m. to 4:00 p.m. – with a one hour lunch between 12:00 p.m. and 1:00 p.m. Lunch is provided by the State Center Consortium. The address to the campus is included in the attached flyer.
