

Industry Credentials Valued by California Employers & Educators

A key component of a successful Career Pathway is the integration of industry-valued certifications. These certifications have benefits to students, educators, employers and communities.

California Industry Credentials Database

This searchable database provides information on third-party credential exams that are issued through Certiport, including:

A list of credentials, which can be filtered by K-12 pathway, industry cluster, or priority sector

Credentials Offered By Community Colleges

The credentials listed have been identified by colleges and key talent as important to employers as a way to match competencies needed for employment. The list is intended to help practitioners fold credentials into community college programs, and to help students obtain employment or demonstrate skills needed in the workplace. Students successfully completing training for these certifications will be prepared to sit for the industry-valued certifications. ***This is a live list, and will continue to change as required by both industry and educators.***
